Welcome Message

Dear colleagues,

The Hellenic Neurosurgical Society has the pleasure to announce the fifth microscopic and endoscopic skull base course and welcome you in Greece.

This course is designed for senior residents in Neurosurgery or early-career neurosurgeons with interest in skull base surgery.

This three-day intensive course will include a combination of lectures and cadaver dissections designed to cover the basic surgical approaches and anatomy required for every skull base neurosurgeon. Faculty will include senior neurosurgeons and ENT surgeons who will demonstrate surgical skull base approaches as well as endonasal – seller anatomy and surgical options.

Upon completion of this course, attendees will be able to discuss indications for surgical treatment of lesions of the cranial skull base, to describe the standard skull base approaches, to perform microscopic as well as endoscopic endonasal skull base approaches to anterior middle and posterior cranial fossa.

We are looking forward to seeing you in Athens.

Moschos Fratzoglou
